

The Siemens logo is displayed in a bold, teal, sans-serif font. It is positioned on the left side of the top banner, which features a blurred background of a woman with glasses and a technical diagram with labels like E0.1, E0.2, and E0.5.

Job ID 202797

# Mandatory internship (m/f) in the field of Internet of Things

Corporate Technology, Munich

## If you really want to make a difference – make it with us

With its 7,000 employees, Siemens Corporate Technology (CT) works hand in hand with the company's business units to ensure Siemens' future. CT conducts research with internal and external partners, including leading universities and promising start-ups. These collaborative endeavors focus on a wide range of future technologies with a view to securing them with patents and supporting them through commercialization. CT also provides development services for Siemens' business units and supports them with methods and tools related to business excellence. Join our team limited for 3 months in the Corporate Technology division as Mandatory internship (m/f) in the field of Internet of Things in München.

### Your new role – challenging and future-oriented

- You will develop the conceptual design and specify the software showing Internet of Things use cases
- You will focus on Web-based software architectures and applications
- You will program the system components
- You will document the results
- There is a perspective to evolve the internship towards your thesis

### Your qualifications – solid and appropriate

- You are a student of Informatics, Computer Science, Electrical Engineering, Information Technology or similar and you are required to complete a mandatory internship under university study regulations
- You show experience in Web technologies (JavaScript, Web APIs)
- You hold deep knowledge in Java software development
- You have very good knowledge in English and / or German

The duration of the internship is based on the study regulations of your university.
